To move your pharmacy forward, we learn where you are. Our experts conduct an extensive review of your business, analyzing data, examining trends and identifying opportunities. We help you determine whether to negotiate with multiple wholesalers or join an existing purchasing group.

We work at your direction to get you the most advantageous contract suited for your specific business.

Strategic purchasing

Armed with your data and our proprietary, cloud-based technology, ProfitGuard optimizes your purchasing in real-time with one click—including package sizes, dosing amounts, preferred manufacturers and more. We highlight the best options between your primary wholesaler and our full-line PBA Health backup warehouse, factoring in price, availability, contract compliance and rebate potential. You choose whether to accept or decline the recommendations.

No need to comparison shop.

Superior consultation

As business partners, we collaborate with you during ongoing evaluations, reviewing volume trends and performance comparisons. But we dig even deeper into details, like profit margins, cash flow, supply chain problems, computer systems, staffing concerns and other pain points. We expect you to tell us what we can do better. Together, we can help you take advantage of opportunities and solve minor problems before they become major.

We're as invested in your success as you are.
